

# CODE BUILDER

## Abstract:

This project, Code Builder, aims to create a powerful AI-assisted solution to generate code based on problem statements, input-output specifications, and expected results. By leveraging the capabilities of Gemini AI, the system provides an intuitive platform for automating code generation, addressing diverse problem domains, and delivering accurate solutions.

## Team members:

# CODE BUILDER

## PROBLEM STATEMENT:

Help solve problems based on the statement, input output

## ALGORITHM:

Algorithmen integrating gemini ai

## EXPECTED OUTPUT:

Code for the statement given in data

A handwritten signature in blue ink, appearing to be 'Ravi', located at the bottom right of the page.
